

Hardworking Louisiana families should be able to afford a place to call home and still put food on the table.

Our state has already created a tool to help make “home” happen for hundreds of Louisiana families each year– a program with a proven track record of meeting Louisiana’s housing needs.

The Louisiana Housing Trust Fund was approved by the legislature in 2003 and received a one-time \$25 million allocation in 2007.

This one time funding resulted in 323 homes developed across Louisiana –

 105 homes accessible to persons with disabilities
 17 homes directly benefiting homeless families

 79 homes for extremely low-income families
 122 homes for low- to moderate-income families

Of the \$25 million allocation, \$22 million was awarded through the Louisiana Housing Trust Fund and leveraged \$61 million in additional investment: Every dollar invested by the Louisiana Housing Trust Fund resulted in 3.7 times as many dollars at work on the ground, bringing “home” into the reach of Louisiana families.
